

Daide Marchet

Director level developer

www.davidemarchet.com / info@davidemarchet.com

Padua / Feltre, Italy

Experience

I offer over 15 years of experience working for project involving various fields from wineries to hotels, to design firms, architectural firms, sports, ecommerce and mobile apps.

Skills

I'm a director-level developer guiding clients from start to finish on their projects. I specialize in Jamstack and agile methods, using technologies like Vue/Nuxt3, headless CMSs (Dato CMS, Contentful, Craft CMS), headless e-commerce (Commerce Layer, Saleor, Gemini Ecommerce), and microservices (Node, Node-RED, Firebase). My aim is to create accessible, high-performance products with CI/CD (e.g., Netlify), focusing on ease of use for clients.

Contributions

Brands I've developed or led projects for.

Beyond the skills

I plan and build clean websites and applications, creating curated digital environments tailored to the client's unique vision. I approach code, myself and life the way a brutalist builder would approach their creation: looking at implementing creative solutions using the best combination the materials at hand will allow me. My enthusiasm for the cultures and architectures of the East and Middle East fuels my curiosity to venture into the globe's less trodden paths. As a founding member of Fuochi Fatui, a Music and Visual Festival in Feltre, Northern Italy, I've played a part in enriching the history of my hometown.
